## INFOGRAPHICS

The use of infographics is encouraged to add a visual break on any communication.

## PHOTOGRAPHY DIRECTION

When choosing a photo from a stock image provider, photoshoots or Artificial Intelligence (AI), keep these directions in mind.

- Incorporating photography that's genuine to Colorado's landscapes and lifestyles.
- Show people in their natural habitat with elements that make them unique, such as unique accessories or tools, and styles of dress.
- Use photos that make an emotional connection.
- Show of diversity of people whenever possible.  
*Definition of diversity is not just race but age, sex, culture, disability, physical body image and sexual orientation.*
- The image should be a representation of the communities we serve.

## tone of voice

Consumers of all generations have become more accustomed to companies – financial and otherwise – that define and maintain real, human personalities. They favor brands that look, act and talk like real people over those that identify only by their business or product.

People want to feel seen and heard. It's not always about getting the best deal or what's best for the bottom line. But, as with most things in life, there's a need for balance. How can Alpine Bank honor more traditionally minded customers while speaking the language of current and prospective customers?

Alpine Bank should strive for the tone of an ongoing conversation, as part of an ongoing friendship, with its current and prospective customers. For many, the topic of banking and finance can come across as complex and even intimidating. We recommend transforming banking into a familiar aspect of our daily experience — meant to make our everyday life simpler and better. Reinforce this idea with some key words, such as:

**CARING • HONEST • SIMPLE • COMMUNITY • OPEN • COMMITMENT • EXCEPTIONAL  
POSITIVE • AUTHENTIC • FRIENDLY • COMPASSION • CULTURE**

When done well, Alpine Bank will personify these models/exemplify these traits:

<b>IS:</b>	<b>IS NOT:</b>
A conversation	A lecture
Open	Distant
Real	Untouchable
Human	Robotic
Empowering	Directing
Reassurance	Alarming
True to life	Computer generated
Authentic	Obsequious

Here are some samples of copy from the Caring Together campaign that rely on the essence of this mood board:

### COMMUNITY

You dreamed of making a difference, ever since you were little. You've accomplished a lot. And you give back to your community. Alpine Bank shares your commitment to community investment.

### COMPASSION

You lead with compassion. You help others feel seen, heard, and valued. Because helping each other is what life is all about. Thank you for choosing to connect with Alpine Bank.

### MORTGAGE (HOME)

For you, home isn't a place. It's a feeling. Where love, kindness, safety and acceptance live. Where dreams are born, and memories are made. Your neighbors at Alpine Bank offer flexible mortgage financing, local processing and knowledgeable staff.

### THE ALPINE WAY

When you succeed. We succeed. Since 1973, Alpine Bank has worked to create a culture that is inspired by caring. We care about our customers, our communities, and our employees. We care about you.

## The following actions will enable conversation-oriented content.

- 1. Take a personal approach.** Use Alpine Bank and we/us, as well as Alpine Bank's and our, interchangeably. And when applicable speak to the customer directly, using you.
- 2. Collect customer photos and testimonials** and use them – feature them regularly.
- 3. Prioritize Contact Us functions.** Make it easy for a customer to talk with a real person.
- 4. Use humor or be inspirational.** Doing so helps to brighten, break up and, importantly, bring a human element into what can otherwise be stale financial services content.
- 5. Humanize products and services.** Craft punchy headlines and inspirational copy that communicate the experience of banking with Alpine Bank, with the detailed benefits and features to follow.

## TESTIMONIALS

We recommend incorporating customer testimonials into the fabric and flow of Alpine Bank's marketing materials. These can exist within a stand-alone section or worked into others. This type of content does double duty – differentiating Alpine Bank from direct competitors and personalizing the bank for current and prospective customers. Authenticity is most important – displaying what a person actually said. Ideally, these "in their own words" elements will be light on text while heavy on story and message.

## HOW TO CRAFT STRONG HEADLINES

Strive to craft headlines that go beyond descriptive and angle toward experiential. To a certain extent, headlines should answer questions such as: How will banking with Alpine Bank be different from another bank? What will my association with Alpine Bank allow me to do? What kind of relationship can/will I build with my banker?

**On copy, less is more.** Aim for brief, informal captions – not lengthy paragraphs and tables. Make up for minimal introductory captions with extensive details on benefits and features on the next page or by sending them to the website for more information. In sentence construction, keep it simple. Focus on subject-verb-object. Rinse and repeat. Idioms and other common phrases are acceptable in small doses.

The Maintenance Department helps with production and installation of these signs, please reach to them.

It is preferred that signs stay true to Alpine Bank’s brand like the example below.

In the case where staying true to Alpine Bank’s brand is not possible, an acceptable treatment for the signs can be done where the circle around the tree is green, with a white tree and white letters. If a casing is being used, this can be white, silver or Alpine green.

Although we are always open to explore what is new and current with signage, we do recommend staying away from trends that will sway us away from Alpine Bank’s brand.

Any additional permanent exterior signs can follow the standards mentioned above.
